

K-12 Environmental Education: Guidelines for Excellence Workshop- Professional Development for Formal K-12 Educators

What? Participants in this one-day workshop will learn how to apply the North American Association for Environmental Education's publication: *K-12 Environmental Education: Guidelines for Excellence*. These guidelines and the companion piece, *K-12 Environmental Education: Guidelines for Excellence Executive Summary* provide educators a roadmap to achieving environmental literacy by setting expectations for fourth (age 10), eighth (age 14) and twelfth grade (age 18) students and outlining a framework for effective and comprehensive environmental education programs and curricula.

What you will receive? Participants will receive a full day of training on the guidelines, lunch and a copy of the *K-12 Environmental Education: Guidelines for Excellence* publication, and its companion piece *K-12 Environmental Education: Guidelines for Excellence Executive Summary*.

Workshop Objectives:

- To identify key characteristics of high-quality environmental education instructional materials;
- To describe age appropriate benchmarks for environmental literacy; and
- To assess your own level of preparation and need for professional development in environmental education

Who should attend? K-12 educators, resource specialists and administrators.

When: Friday, October 26th, 2019; 9:00am – 4:00pm
